This book is caught somewhere between being a parody of 1990s Cyberpunk, and being a textfile document found on a 1980s BBS, instructing you how to pose on the scene like you're a LEET HACKER. Part of it based in a little bit of fact. Part of it totally made up, like how to fit in with a Cybercowboy/grrrl crew. The attitude and the feel of the book was spot-on, however. I was looking for an informative and historical reference to where we were with Cyberpunk in the 1990s. This wasn't the book for me. But if you know someone who fits the profiles on the cover (or looks like Abby Sciuto from the television series NCIS), this may be the perfect book for them.

I so want to go back to 1995 and be cyberpunk like this. And when you show this to high school kids, they marvel at the serious lack of tech us oldsters had to put up with. It brought back both fond memories and the desperate hopelessness of tech that just didn't work that well.
