mother who is a professor loved this. Made her a great christmas present.0 of 0 people found the following review helpful. Good Job, Ilana!By Donald R. JanousekAnother fascinating book by a fascinating author. Ilana Lehmann uses her experience as a Professor at a major university in New England to show the twisted and comedic events in the life of a college professor in dealing with contemporary students. Her prior book on Star Trek and Disability was a gem. Her latest book Dear Student is a diamond. One of our greatest new authors. If you like humor, irony and real writing this is the book for you. Five Stars is not enough for this one! Good job, Ilana!0 of 0 people found the following review helpful. She is a great writer. If you want to have a good ...By Donald R. JanousekAs someone with a BS (Magna Cum Laude) and a Juris Doctor degree, I think I know something about writing. I find this latest book by Ilana Lehmann to be very well written. I am a fan of the Roman satirical author, Juvenal, and I think Ms. Lehmann is his equal. Her latest book is comedic, ironic, satirical and is based upon her personal experience. She is a great writer. If you want to have a good read, BUY THIS BOOK@

College is much too serious to be taken seriously. Dear Student is a guide on how to avoid taking Higher Education too seriously. A collection of tweet-sized snarks about student papers, emails, and pleas. A great book to keep in your purse, pocket or bathroom because you don't have to remember any plot, characters, or worry about what will happen next. Keep it handy for when you need an emergency giggle or two. Sticklers, grammandos, grammar police, and anyone who has ever graded a paper or cringed at a poorly written email will enjoy this book.

About the AuthorIlana Lehmann has been teaching graduate students in the Ivory Towers since 2006. She holds a B.S. in psychology, a M.S. in counseling, and a Ph.D. in Rehabilitation Counseling. She has taught in both the traditional brick-and-mortar classroom as well as in a virtual classroom online. She enjoys teaching research methods. Grading is not always as much fun.
