Worked perfect for this, and now my parrot is a regular Larry bird. No pun intended l.1 of 1 people found the following review helpful. Cute and Fun to Play With TooBy Love to shopOur Elf on the Shelf Chippey bought this to celebrate our son playing basketball. The goal and one ball included was the perfect size for our Elf and it turned out to be a great idea and our son loved it. We bought extra baskets from another seller to go with it and it was all so cute. We did use the goal later just to play hoops at the dinner table and it worked great. The suction cup is vital to making goals, otherwise it falls over. The little book it comes with was cute for the Elf part.0 of 0 people found the following review helpful. Great Desktop ToyBy T. CozierI bought this little kit out of curiosity to put on my desk at the office. It's easy to assemble and sticks well to very smooth surfaces. The ball is some kind of foam not plastic and it's not very bouncy. I've had it for a few months and after playing with it for a while the ball is no longer a perfect sphere but it still goes in the basket without problems (other than my aim). Everyone who comes to my desks wants to playing with it. Will probably get a few more as gifts for a few co-workers.

You don't have to be 6'7" and a world-class athlete to master this one-of-a-kind version of basketball. This is a game that anyone can play when tedium sets in at the office. Kit includes a 32-page rule book on Desktop Basketball to get

you started, a miniature basketball, and an easy-to-assemble basketball hoop, post, suction-cup base, and backboard.
