Laughing, crying and learning 'how to' are fringe benefits of wondrous life tale toldBy Stanley SkovJanine Jacques shines as a champion for animals too numerous to list. We laughed and chortled out loud at her hand crafted tales, never for a moment doubting her honesty. The first part of her book recounts her robust and fascinating childhood under the direction of her wonderful taskmaster/mastermind animal whispering mother Carlene, who through the 1960's, and 70's, manages to turn the as yet untitled craft of animal rescue into first a successful circus, (wherein profits were donated to charity) then yet more successful animals for movie etc. biz.By page 60 the tide has turned and we have all come from a cage free childhood to helping to place and train Great Danes for people who truly need and benefit from their great talents and abilities. My laughter turned into a rain of tears.Janine writes so honestly and apparently quickly that you fall in love with her, if you are like me, and you want to go find her and say, "Lets go riding!". But she too is busy turning the wheels of our ever-complicating societal wheels.You may also cheer when she gets out of her car as an adult to herd a flock of stranded ducklings from an intersection of motorists who exacerbate the problem the ducklings face against motorized people who know not what to do to with inhabitants of the natural world.Janine helped me in several ways explaining systems, solutions and pouring out compassion accidentally as she struggles to navigate and interpret the world which we so called human beings are rapidly making unlivable for man, mother, human, child or creature. I am baffled and grief stricken as I struggle to work with and care for many animals as autos, screens,developments, institutions, legal issues and exorbitant licensures swallow up the true freedom and joy of life.Maybe Janine has given me hope, maybe she has sealed the coffin of my hope for the wisdom and intelligence of huMAN. But she has made me less lonely, given me strength and new resolve and quite a few practical bits that will help in what i am doing to bring animals to children and others and I had alot of fun along the way. I ended up reading this book out loud to my partner who is my human Great Dane rescue genius.There are quite a few typos in this book and it seems to have been self published.I think I know why, she us off in her purposeful way to slay dragons more pressing than the publishing of this book and the preening of a super famous ego.Next time we will edit you for free, baby.Much love goes from and should come around to Janine.One wonders what will happen when heroic seeming and therefore misfit American girls have succumbed to the same fate as her circus world turned animal rescue. Who will rescue the humans from themselves? Janine may have a clue. I hope so.BE LOUD JANINE!!Be Proud. ?1 of 1 people found the following review helpful. I had no idea!By WeinrothWhen I first found the Service Dog Project, it was just in time to see the newest pups being born, the Scarlott litter. Watching the survival struggles of new little beings who will grow to become someone's most precious friend and stalwart ally seemed quite enough. But I was wrong. One day I happened on mail call and found that there was some real mischief at work. Then, I found the chicken brick ritual (go look it up) and was nonplussed. Who was behind all of this madness?In "Dogs, Donkeys Circus Performers", I found the Antic Pivot responsible for the whole thing, Carlene White. Through her daughter, Janine's memories, I have been taken into some 'way out of the box adventures. Whatever they may be, Carlene is indomitable, the animals are creative, and group cooperation saves the day. This book is a personal reflection of many years' experience learning what wealth really is and what it is for: a joyful willingness to help others and to take life with a grain of salt. Thanks for the chance to become a part of it.On my Kindle, I find the pictures hard to make out, but believe me, I work to see them!1 of 1 people found the following review helpful. A must read!!! Heavn sent down 12 acres and an AngelBy Deborah GaffneyThis is a must read book, I started and did not put it down until I finished it! I laughed, I cried and I truly enjoyed the book. It makes you look at the movie and TV commercial world differently, who knew there are ducks that can't swim? But to find out in the middle of filming a movie! What is so interesting is it's all true and SDP is still working hard to supply well trained service dogs to our Military Service people and others that need balance support at no cost to them, that is why I say a 12 acre piece of Heaven is missing along with one of their Angels and it fell in Ipswich Ma. Carlene White, the owner of SDP gives, and gives and gives more, she has such a magic touch with the Great Danes on the farm, she always trains with love. Puppies that are only 3 weeks old are starting to understand their roll in life. The only negative thing I can say is it's not long enough I wanted to keep reading. But I can because on the SDP web site there a Daily Doggie written by Carlene every morning and a very large archive of past DD's. Please go to their site and become an addicted CP (Camera Person) like a lot of us. They have live cameras that allow you a peek in to Heaven with births of new puppies, more coming soon!!! Thank you to the Author who is Carlene's daughter, she lived this comedy!

Hilarious stories of animal adventures on a path to making the world a better place for all creatures; big, small, four legged and two legged. However, the book is not just about animals, its about thinking outside the box, checking your ego at the gate, living a purposeful life that benefits others, and most importantly laughing through life's challenges.
