NEVER TAKE NO FOR AN ANSWER By Linda

Bily"She will be dead soon." Fifteen years after that awful pronouncement, Sue Buchanan is lecturing, running her successful corporation and reminding all breast cancer patients that we are NOT victims. Stand up for your rights, stand up and do the unexpected, stand up and laugh out loud. Her honest story of her battle with breast cancer and some of the doctors she met along the way is a quick, enjoyable read. Her continued joie de vie and encouragement for all women is delightful. A good book when you are down in the dumps - it's enough to shake you out of the doldrums and into some action! 0 of 0 people found the following review helpful. Honest, Funny Encouraging! By Michigan Mom This book is written from a Christian perspective -- scripture is referenced in context but not thrown in your face -- and is humorous and encouraging to boot! Buchanan makes the point that cancer is as individual as a thumbprint -- everyone has a thumbprint, but each person's is unique in some way. Cancer may "look" the same in different people, but we all have different body chemistries, faith, genes etc. that make it act differently. The reality for a cancer patient is that no one really knows the outcome that any of us will have. I found Buchanan to be wonderful -- she has a sense of humor, faith in God and a dose of good old fashioned common sense. I would highly recommend this book to anyone trying to deal with or understand some of the emotions related to breast cancer. If nothing else, it is a quick, fun read!

This warm, funny, and honest book provides practical help and hope for women suffering from cancer. It was previously published as *Love, Laughter, and a High Disregard for Statistics*.

When the doctor pronounces a patient "as good as dead," does she have to take it lying down? "No way!" says Sue Buchanan, who outlived the doctor who predicted she'd die of breast cancer fifteen years ago. Warm, funny, and very, very honest, *I'm Alive and the Doctor's Dead* offers practical help and hope for women suffering from breast cancer. This encouraging book is a high-spirited manifesto for any woman who is facing a medical verdict she doesn't want to hear. Buchanan tells her story and assures women that there is life—and a lot of it—during and after cancer --
