Scott Proctor Jessica Hagy's book, "Indexed," offers some unique, interesting...and often entertaining...insights into the world at large through the mediums of simple charts. The relationships Hagy points out in this book are insightful and often surprising. While this book provides interesting and thought-provoking reading, it is light on content. The pages are not numbered and it took me approximately ten minutes to read the entire book. Despite the book's brevity, it is worth a read. The question that potential purchasers should ask..and answer...is if the book is worth the price. The author offers content through a website ([...]) but I am not sure of the overlap of the web site's content and the content of the book. In the final analysis, Hagy offers interesting perspectives on many facets of life through a basic medium...her content is worth consuming. This book may not be the best (or most economical) way to peruse her content, though. 0 of 0 people found the following review helpful. Stimulte your creative mind and learn to "read" in a new way By Timothy J. Haas Great book to stimulate your creative brain. Gives you an opportunities to "read" in a new way, because this is not like a real book. It's pictures and words combined in such a way that the viewer - not the reader - is inspired to find the message. Each page has one and each page makes clear that a picture is worth a thousand words. Now, how can I communicate better using my unique tools and perspectives. I appreciate the author for boldly bringing this artform to my attention. Originally, I was seeking a book on how to draw, but Hagy makes it clear that you don't have to be a great drawer -- not that she isn't -- to communicate ideas with simple drawings. 0 of 0 people found the following review helpful. Clever book for math lovers By Lisa R. Levy We saw this book at a friend's house. If you like math, it is very creative--uses graphs, charts and other math visuals to create funny "cartoons". We gave a copy to my daughter's high school math teacher who loved it as much as we did.

.com A unique, hilarious take on the modern world Jessica Hagy is a different kind of thinker. She has an astonishing talent for visualizing relationships, capturing in pictures what is difficult for most of us to express in words. At [indexed.blogspot.com](http://indexed.blogspot.com), she posts charts, graphs, and Venn diagrams drawn on index cards that reveal in a simple and intuitive way the large and small truths of modern life. Praised throughout the blogosphere as "brilliant," "incredibly creative," and "comic genius," Jessica turns her incisive, deadpan sense of humor on everything from office politics to relationships to religion. With new material along with some of Jessica's greatest hits, this utterly unique book will thrill readers who demand humor that makes them both laugh and think. An Exclusive Indexed Card from Jessica Hagy
