Leland Gregory : Stupid on the Road: Idiots on Planes, Trains, Buses, and Cars (Stupid History) before purchasing it in order to gage whether or not it would be worth my time, and all praised Stupid on the Road: Idiots on Planes, Trains, Buses, and Cars (Stupid History):

A GOOD BOOK FUNNY BUT A LITTLE BACKSTORY TO ILLUMINATE CONTEXT OF SITUATIONS WOULD HAVE MADE FOR A BETTER BOOK!By AUTISTIC WEREWOLFStupid on the Road: Idiots on Planes, Trains, Planes, Buses and Cars is funny and has some really good laughs in it. Some of the situations fall flat but on a whole Stupid on the Road: Idiots on Planes, Trains, Planes, Buses

and Cars is what I'd call lite entertainment. Stupid on the Road: Idiots on Planes, Trains, Planes, Buses and Cars is very readable. The funny situations aren't delivered with a lot of back-story of the kind that cops provide. I found that knowing the backstory of some funny events gives us missing context that add to the humor of situations. I have found that funny criminal and stupid people books are much funnier when correctional officers, police officers and ex-military folks tell the tales. Military, policement and correctional officers are trained to tell stories in a way that better preserves the context of a funny situation making the reading far more enjoyable. Stupid on the Road: Idiots on Planes, Trains, Planes, Buses and Cars does an ok job of building context but it is far from great at building the strong backstory that leads to intense humor. Stupid on the Road: Idiots on Planes, Trains, Planes, Buses and Cars is an enjoyable book but lacking the funny back story to many situations dulls the impact of many of the humorous situations it shares. 2 of 2 people found the following review helpful. WEIRD STUFF BUT PLENTY LAUGHING By Joseph H. Race Another compilation of weird, stange, crazy and funny stuff that people do on the road, in the air, on trains and buses, and other places and locations where the word 'idiot' takes on its own special meaning. We have driving instructors getting busted for DWI, snakes on planes scaring little girls, flying money almost causing a riot, a man suing for lost taste and smell after an accident, and a discovery that roadways are dirtier after the work crew is fired. It's fun and interesting going from page to page, and finding out about the folly of human nature, which we likely knew anyway. Leland Gregory did a good job in illustrating how many of us go day-by-day, and somehow survive, and the species continues. 0 of 0 people found the following review helpful. Another solid entry from Leland Gregory By KC Jones I've bought several of Leland Gregory's books and they're fine for what they are: good "throne" reading, but not serious. Definitely not "scholarly" and certainly there are mistakes and unsupported "gossip" more than facts. But for a quick mindless read, you could do worse.

New York Times best-selling author Leland Gregory (Stupid History, Stupid American History) presents his 15th collection of silly, weird, shocking, amusing anecdotes highlighting all the hilarious, weird situations that occur on planes, trains, buses, and especially cars. Stupid on the Road: Idiots on Planes, Trains, Buses, and Cars, the compilation of human stupidity from New York Times best-selling author Leland Gregory, is a riotous collection of the unbelievably bizarre events and behavior that result when people strap themselves in behind the wheel. This time, Leland--who so entertainingly highlighted humanity's stupidity in the areas of crime, business, love, politics, cruelty, and history--turns his attention to idiots on the road and in the air. For instance, here are actual statements given by insurance policyholders describing their automobile accidents: "A pedestrian hit me and went under my car." "The guy was all over the place. I had to swerve a number of times before I hit him." These true stories, from the strange to the outrageous to the just-plain dumb, will have you shaking your head at the wacky misadventures that have occurred as people attempt to get from point A to point B.
