**Gina Spadoni : Succulent Serenity: A Coloring Book** before purchasing it in order to gage whether or not it would be worth my time, and all praised Succulent Serenity: A Coloring Book:

Succulent Serenity is an adult coloring book featuring over 30 original hand illustrated designs perfect for relaxing. It's the first book in a series; Succulent Serenity, Cactus Calm follows. The drawings highlight the desert plants and each also features a unique pot, including many vintage tea cups. Perfect for the garden lover. Varying levels of complexity help these designs work for everyone, and you can match which illustration you color to your mood. There is enough room, too, to get your gel pens in. No insanely small spaces. The pages of succulent art also have unique backgrounds that are fun to color. Many have a Southwest flavor and were inspired by kilim rugs, ikat pillows and desert design. Each book page is printed on one side only so you don't have to worry about bleed-through, and you can easily remove

them to hang as we've left room around the designs for cutting (and you won't have illustrations that disappear into the fold). Several extra "notes" pages are included for testing colors or journaling. Artwork from this book has been featured in national publications, and a design is also used on the Color Hang Wall Art Panel products.
